WORK EXPERIENCE

VIVIANEHEALTH

Product Designer Freelance • **Nov. 2025 – present**

- Led end-to-end product design for a multi-module digital health ecosystem covering Telemedicine, Pharmacy Management, and Laboratory Services, ensuring seamless patient-provider interactions.
- Created user flows, wireframes, and high-fidelity prototypes that improved appointment booking, e-prescription management, and digital lab result delivery for patients and healthcare providers.
- Collaborated with doctors, pharmacists, and engineering teams to translate clinical workflows into intuitive digital experiences, reducing user friction and increasing task completion.
- Designed role-based dashboards for patients, pharmacy admins, pharmacists, and doctors, optimizing information hierarchy and reducing decision-making time across the system.
- Conducted usability testing and iterative design enhancements, resulting in clearer navigation, reduced onboarding confusion, and improved adoption across all user groups.

REJIGNAIJA

Product Designer freelance • **Jan. 2025 - present**

- Gathering and evaluating user requirements in collaboration with product managers and engineers
- Leading the UI/UX design for a client's book reading and review platform tailored to encourage reading and streamline book discussions through structured review sessions.
- Developing UI mockups and prototypes for mobile app
- Conducting User research, to understand user pain points and needs.
- Collaborated with cross-functional teams, integrating feedback and iterating on design prototypes to align with stakeholder objectives and enhance overall product quality.

- Implemented product design across the entire product lifecycle from UX to UI while creating desirable digital experiences from early concepts and wireframes through to pixel-perfect UI design

UI/UX Africa Community

Product Design Lead • Nov. 2024 – Sept. 2025

- Led creative direction and design for major app projects.
- Spearheaded design community bootcamp, as a design tutor.
- Optimized user flows and simplified complex functionalities for design products across different platforms.
- Collaborated with cross-functional teams, integrating feedback and iterating on design prototypes to align with stakeholder objectives and enhance overall product quality.
- Engineered responsive email templates and app store assets, increasing conversion rates by 18%.
- Revitalized 10+ client websites, aligning interfaces with user needs and current industry trends to boost engagement by 30%.

EDUCATION

Product Design (UI/UX design)

PDU Africa (2020)

Human Physiology (Msc)

University of Benin. Benin City (2023)

PROJECT HIGHLIGHTS

1). Sawapay (Fintech app)

CASE STUDY: - -> Read here <https://shorturl.at/oAhIT>

2). CidraNet (web3 Token management app)

CASE STUDY: - -> Read Here <https://shorturl.at/lbS50>

3). Skana (Modern Payment Platform)

CASE STUDY: – -> Read here <https://shorturl.at/eNmCv>
